

LOWA Seeker S3 GORE-TEX® Safety Boots Black

The *black LOWA Seeker S3 GORE-TEX® S3* is a safety boot from the *LOWA WORK COLLECTION*. It came about following cooperation between LOWA and ELTEN. The LOWA Seeker S3 **safety boots** feature a modern trekking look with the upper material consisting of robust and breathable full grain cowhide leather and the textile material Cordura®, which is particularly wear-resistant, tear-resistant and shape-retaining.

The full padded bellows tongue prevents the penetration of dirt into the shoe. The full-length, exchangeable inlay sole is antistatic and made of sturdy material. Additionally, these **safety boots** are approx. 50% lighter than comparable soles made of natural materials. A steel toe cap protects the wearer against impact and pressure loadings and at the same time offers enough room for the toes thanks to its ergonomic shape. Penetration protection is provided to the **LOWA Seeker S3 safety boots** by a midsole made of corrosion-resistant stainless steel. It features a high level of slip resistance thanks to its double-density profile LOWA ATC 2000 sole. The outsole is antistatic, abrasion-resistant, heat-resistant up to approx. 200° C & for short periods to 300° C and flexible at cold temperatures to approx. -20° C.

- Upper: cowhide leather, textile material cordura®
- Lacing: open hooks
- Lining: GORE-TEX® performance comfort footwear
- Sole: Rubber/PU sole LOWA ATC 2000
- Toe cap: Steel
- Penetration Resistance: Steel midsole
- Certified safety boot: according to: EN ISO 20345 S3 CI/HI/SRC, form S3
- Colour: black
- Work Collection
